CLAIMS

1-20. cancelled

5

21. (previously presented) An apparatus for online transmission of information from a first media to a second media, comprising:

a marking device configured to enter said information on said first media; and

10 a transmitter configured to transmit said information entered on said first media to said second media, said transmitter being connected to said marking device, said second media being an electronic duplicate of said first media;

wherein said pen comprises a tip, and

15 wherein said pen captures video capturing motion of said pen and said pen captures video of an area about half an inch above said tip of said pen.

22. (previously presented) The apparatus of claim 21, wherein said marking device comprises:

a pen.

20

23. (previously presented) The apparatus of claim 21, wherein said first media comprises a paper media and said second media comprises an electronic media.

25 24. cancelled

25. (previously presented) The apparatus of claim 23, wherein said first media comprises:

a paper book.

30

Application ser. no. 09/993,429

26. (previously presented) The apparatus of claim 23, wherein said first media comprises:

a paper magazine.

5 27. (previously presented) The apparatus of claim 23, wherein said first media comprises:

a paper shopping catalog.

10 28. (previously presented) The apparatus of claim 21, wherein said transmitter comprises:

a Bluetooth-enabled device.

29-37 cancelled

15 38. (previously presented) The apparatus of claim 21, wherein said first media does not consist of a netpage form.

39. (previously presented) The apparatus of claim 21, wherein said first media further comprises:

20 a radio-frequency tag.

40. (previously presented) The apparatus of claim 22, wherein said marking device further comprises:

a transmitter device; and

25 a receiving device.

41. (previously presented) The apparatus of claim 40, further comprising:
a digital image capture device.

30 42. (previously presented) The apparatus of claim 40, further comprising:
means for ad-hoc connection to a Web server.
